Profile

I am a passionate Software Engineering undergraduate with a strong focus on full-stack web development, UI/UX design, and modern AI-enhanced applications. I enjoy turning ideas into functional, clean, and user-friendly solutions while following best practices in development and design. Through academic and self-driven projects, I have gained practical experience in MERN stack development, API integration, and building intuitive user interfaces. I am now seeking opportunities to apply my skills, learn from real-world engineering teams, and contribute to meaningful software projects.
