Profile

Software Engineering undergraduate with industry experience as a Software Engineering Intern at Sri Lanka Telecom. Experienced in full-stack web development, Flask backend development, REST API integration, Linux-based deployment and modern web technologies. Skilled in developing scalable applications, deploying solutions on Ubuntu servers and collaborating within development teams to deliver reliable software. Passionate about building innovative, user-centric solutions and continuously expanding my expertise in software engineering and emerging technologies.

Professional Experience

01/2026 – 07/2026

Software Engineering Intern

Sri Lanka Telecom HQ,
Colombo

- Developed and enhanced a multi-tenant AI agent management platform using modern web technologies.
- Designed and implemented frontend interfaces for dynamic agent creation, configuration and knowledge base management.
- Worked with Flask-based backend services, React frontend applications, Docker containers and SQLite databases.
- Deployed and configured the project on an Ubuntu Virtual Machine using Docker and Docker Compose, managing application containers and environment configurations.
- Gained hands-on experience with Docker, Git, Linux server environments and workflows.

Projects
