Profile

I am Methmi Himaya Pathirana, a third-year BSc. (Hons) Software Engineering undergraduate at the Sri Lanka Institute of Information Technology (SLIIT). I am a passionate and creative individual with a strong interest in software development and design. I am eager to apply my knowledge in real-world environments, contribute to impactful projects and gain hands-on experience through an internship that supports both technical and creative growth.

Education

2023 – present	BSc.(Hons) Information Technology specializing in Software Engineering <i>Sri Lanka Institute of Information Technology (SLIIT), Malabe</i>
2023 – 2024	Diploma in English Language & speaking <i>SVS School For English, Nugegoda</i>
2019 – 2022	G.C.E. Advanced Level Examination <i>Visakha Vidyalaya, Colombo 04</i> Got passed with 1A & 2Bs (Logic, Information Technology & Mathematics)

Skills

Technical Skills

- **Languages & Frameworks:** JavaScript, HTML, CSS, React.js, Node.js, Express.js, Kotlin, React Native
- **UI/UX Design Tools:** Figma, Canva
- **Styling & UI Libraries:** Tailwind CSS
- **Version Control & Tools:** GitHub, Git, VS Code, Postman
- **Database:** MongoDB, MySQL
- **Development Practices:** Agile Methodology, Prototyping

Soft Skills

- Leadership & Team Coordination
- Communication & Collaboration
- Problem-Solving
- Time Management
- Adaptability

Languages

- Sinhala [Native]
- English

Certificates

- UI/UX basics - Great learning
- Figma Design Basics & Features - Alison
- Responsive web design - FreeCodeCamp

Projects

07/2024 – 11/2024

Music Store system

Java | OOP concepts | year 1 semester 2

03/2025 – 03/2025

MOMENTO - Event booking app

UI/UX Design | Figma | Prototyping | year 2 semester 2

Designed a user interface for an event booking platform using Figma as part of academic coursework. The app allows users to book or inquire about venues, cakes, decorations, and salons. Created interactive prototypes with smart animations and applied a 60:30:10 color scheme (blue, white, yellow) for a clean, vibrant UI. Strengthened skills in UI/UX design and prototyping.

02/2025 – 04/2025

NELSON ENTERPRISES - Gases & Accessories Management System

Team Leader | MERN Stack | Agile Methodology | year 2 semester 2

Led a team of five in developing a web-based management system for Nelson Enterprises, a physical store in Narammala, Sri Lanka. The system streamlines business operations with online ordering and delivery. Built using the MERN stack and styled with Tailwind CSS, following Agile practices with regular client feedback.

Key Features:

- User, Inventory, Order, Delivery & Customer Support Management
 - Shopping cart, order placement, and payment handling (**my primary responsibility**)
-  Github repository - <https://github.com/MethmiHP/Gas-Management.git>  (**dev branch**)

05/2025 – 06/2025

Walletry - Finance management app

UI/UX Design | Android Studio | year2 semester 2

10/2025 – 10/2025

GREENLOOP - Reuse. Recycle and Track Consumption

Team Leader | React Native with Expo | Firebase | year 3 semester 1

Led a team of four in developing a mobile App for SDG 12 - Responsible consumption and production.

Key Features:

- Waste management, User management, Notification system, Point and badges system, Analytics management.
 - Notification system, points and badges system (**my primary responsibility**)
-  Github repository - https://github.com/MethmiHP/GreenLoop_mobileAPP2.git  (dev branch)

10/2025 – 10/2025

My Health - Hospital Management System

Team Leader | MERN Stack | year 3 semester 1

Led a team of four in developing a webApp for a hospital management system.

Key Features:

- Appointment scheduling, Patient record management, Payment and Analytics.
- Patient record management (barcode, scanner interface) - **my primary responsibility**

 Github repository - https://github.com/MethmiHP/My_Health.git  (dev branch)

11/2025

Talk To Me - Gesture-to-Speech communication App (On going)

Mobile App | Flutter + TensorFlow Lite | Machine Learning | My Own Project

Currently developing an assistive mobile application designed to help **non-verbal individuals** communicate using simple **hand gestures**. The app uses the device camera to detect gestures in real time, converts them into **text** and provides an option to **speak the output** using Text-to-Speech. The project prioritizes accessibility, offline usability and minimal user interaction to support people with speech disabilities.

Key Features (in progress):

- **Real-time hand gesture detection** using a custom-trained TensorFlow Lite model
- **Gesture → Text conversion** displayed instantly on the screen
- **Text-to-Speech output**, enabling users to “speak” their intended message
- **Camera-first interface** with no login to ensure instant accessibility
- **Local history storage** for quick access to previously generated messages
- **Lightweight, on-device ML** for offline use and improved privacy

 Github repository - <https://github.com/MethmiHP/Talk-To-Me.git> 

Additional Qualifications

2025 – Present	Volunteer in RAS IEEE <i>Editorial team video editor</i>
2024 – Present	Member of LEO Club of SLIIT
2022 – 2023	Diploma in Psychology and Councelling <i>IMBS green Campus, Gampaha</i>
